

IIE Chapter #1 MAY 2010 Newsletter

Dear Chapter # 1 Members:

MESSAGES

Please join me in welcoming the chapter's newest member, **Gautam B. Chhibber**.

We had a relatively smaller turn-out for the tour of Emerson Network Power earlier this month but the members felt the tour was very informative. Todd Schneider, one of our chapter members from Nationwide Children's Hospital won the \$50 raffle. Congrats Todd!

We have ideas for two potential tours – a visit to AutoZone's Distribution Center in Zanesville or one of the mail carrier hubs (UPS/FedEX/USPS) in Columbus. We would like to hear from you on what you want to see. Please chime in with your ideas.

EVENTS

Monday, June 7, 2010

OSU ISE Spring Capstone Project Fair

Students in the Integrated & Systems Engineering department at OSU work on projects implementing IE concepts to improve processes at leading organizations in Columbus. Don't miss this opportunity to review the application of IE concepts. Please check the attached flyer for a sampling of sponsors and projects.

OPPORTUNITIES

Mansfield Industries is looking for an Industrial Engineer. Please contact Steve Cummins (contact info below) if you are interested in the position.

Duties / Responsibilities

- Lead teams of hourly and salaried personnel in Lean / Kaizen projects in the areas of safety, quality, and productivity.
- Drive process improvements in all areas of the business -- especially Assembly, Fabrication, and Materials.
- Perform time studies and line layouts in support of process improvement teams.
- Lead implementation projects of new equipment and new technology -- including automation equipment and quality inspection processes utilizing vision systems.
- Provide hands-on real-time engineering support to production and quality problems.
- Work with Design Engineering and Maintenance in support and introduction of new product implementations into production.

Qualifications for the ideal candidate

- B.S. in Industrial or Mechanical Engineering
- Formal Lean Manufacturing or Six Sigma training and/or certifications
- 3 - 8 years of Industrial / Process Engineering experience leading Lean / Kaizen / Six Sigma process improvement teams.
- Experience with assembly automation equipment and/or quality vision systems.
- Hands on experience troubleshooting / root cause analysis on production and quality problems.
- Formal training and/or certifications in areas of safety and quality.
- Excellent PC skills -- including MS Outlook, Word, Excel, and Access.
